

Restrictive Physical Intervention Policy

RIVERSIDE BRIDGE SCHOOL
'EXCELLENCE FOR ALL'

Ratified by Governors: 6th February 2018

To be reviewed: February 2019

RESTRICTIVE PHYSICAL INTERVENTION POLICY

Review Frequency:	Annually
Date of ratification:	February 2018
Date next review due:	February 2019
Scope of Policy:	This policy applies to all staff, students, governors and volunteers at Riverside Bridge School

Designated Behaviour Lead: **Kim Cerri**
kice@riverside.bardaglea.org.uk
Ext: 201060

1.0 INTRODUCTION

- 1.1 In Riverside Bridge School there are children whose disabilities can be associated with severe behavioural difficulties and who can present behaviour that may necessitate the use of restrictive physical interventions to prevent injury to themselves or others or damage to property.
- 1.2 This policy has been prepared with direct reference to the following documents:
- Guidance on the Use of Restrictive Physical Interventions for Pupils with Severe Behavioural Difficulties. <http://www.dfes.gov.uk/sen>.
 - Guidance on the Use of Restrictive Physical Interventions for Staff Working with Children and Adults who Display Extreme Behaviour in Association with Learning Disability and/or Autistic Spectrum Disorders <http://www.dfes.gov.uk/sen>.
 - DfEE Circular 10/98 - 'Section 550A of the Education Act 1996: The Use of Force to Control or Restrain Pupils' http://www.dfee.gov.uk/circulars/10_98/part1.htm
 - Department of Health Guidance on the use of Physical Interventions for Staff Working with Children and Adults with Learning Disability and/or Autism <http://www.doh.gov.uk/learningdisabilities/dgapp1.htm>
 - Bath and North East Somerset Physical Intervention Guidance for Schools.
 - Barking and Dagenham Positive Handling Guidance.
 - British Institute of Learning difficulties (BILD): Physical Interventions – A Policy Framework
- 1.3 This policy connects to and is consistent with our other Policies, especially those on Behaviour Management, Behaviour Support documents, Health and Safety and Child Protection.

2.0 RATIONALE

- 2.1 At Riverside Bridge School our teachers and teaching assistants may at some time be faced with the management of pupils who are displaying challenging behaviour. This can only be managed once they have authority from the Head Teacher and have undertaken appropriate training to use taught restrictive physical interventions. However, at all times the use of

physical force must be reasonable and comply with national and local guidelines as set out in Riverside Bridge School's Physical Intervention Policy.

- 2.2 This policy seeks to ensure that all Riverside Bridge School staff adopt an approach to physical intervention that is based upon a common set of principles and good practice. All our staff need to be safe and confident in how they manage challenging behaviour.
- 2.3 Parents need to know that their children and those who are working with them are safe. They need to know that they will be properly informed if their child is the subject of physical intervention; they need to know the nature of the intervention and the rationale for its use.
- 2.4 This policy sets out to clarify the options open to staff when all the normal systems have failed or when there is a clear emergency. If staff operate within the policy and use appropriate physical interventions, they can be free of undue worry about the risks of legal action against them and reassured that the school will offer support if they are challenged. However, within Riverside Bridge School the use of physical force that is unwarranted, excessive or punitive is not acceptable. Failure to comply with this policy, when considering or using physical force, will be subject to Child Protection Procedures as laid down by the Safeguarding Children's Board.

3.0 SCHOOL EXPECTATIONS

- 3.1 At Riverside Bridge School we promote values which place the paramountcy of the child's best interest at the core of our work. To achieve consistency with these values, within this policy we set out to ensure that physical interventions are used as infrequently as possible and are only employed in the best interests of the pupils and students. When used, everything possible is done to prevent injury and to maintain the individual's sense of dignity.
- 3.2 To ensure the use of physical intervention is minimised, preventative strategies will be adopted. Prevention will be achieved by:
 - ensuring that the number of staff deployed and their level of competence corresponds to the needs of children and the likelihood that physical interventions will be needed
 - helping pupils avoid situations and triggers known to provoke 'challenging' behaviour
 - delivery of a properly planned and differentiated curriculum that provides appropriate levels of challenge to all pupils
 - creating opportunities for pupils to engage in meaningful activities which include opportunities for choice and a sense of achievement
 - maintenance of an effective school behaviour policy that is known and understood by staff and pupils
 - development of positive behaviour support plans
 - development of staff expertise in working with pupils who present 'challenging' behaviours
 - recognition of the early stages of a behavioural sequence likely to develop into 'challenging' behaviour and use of 'diffusion' techniques to avert any further escalation

4.0 REASONABLE PHYSICAL INTERVENTION

- 4.1 At Riverside Bridge School we recognise the distinction between physical contact or touch, used appropriately in everyday situations to support, encourage, guide or comfort a pupil, and the use of force to restrict movement or to disengage from pupils whose behaviour presents a clear risk of injury.

- 4.2 Any physical intervention must be proportionate to both the behaviour of the individual to be controlled and the nature of the harm they might cause. These judgements have to be made at the time, taking due account of all the circumstances, including any known history of other events involving the individual to be controlled.
- 4.3 DfEE Circular 10/98 - 'Section 550A of the Education Act 1996: *The Use of Force to Control or Restrain Pupils* allows teachers, and other persons who are authorised by the Head Teacher to have control or charge of pupils, to use such force as is reasonable in all circumstances to prevent a pupil from doing, or continuing to do, any of the following:
- committing a criminal offence (including behaving in a way that would be an offence if the pupil were not under the age of criminal responsibility)
 - injuring themselves or others
 - causing damage to property (including the pupil's own property)
 - engaging in any behaviour prejudicial to maintaining good order and discipline at the school or among any of its pupils, whether that behaviour occurs in a classroom during a teaching session or elsewhere.
- 4.4 Nevertheless, at Riverside Bridge School it is expected that the use of physical intervention will be rare and only applied in exceptional circumstances when a particular need arises. It should not become habitual or routine.
- 4.5 Reasonable physical intervention will:
- always be the minimum force required (what is needed and not more) to prevent damage or injury or restore good order
 - involve minimal use of pain or discomfort
 - be the least intrusive method which is consistent with the safety of staff and pupils (disengagement strategies)
 - not subsequently lead to feelings of guilt or regret by the member of staff
 - be something they would be happy for a colleague to witness
 - have been considered and agreed
 - have been taught and practiced in training
 - take account of the age, understanding and gender of the pupil
- 4.6 Acceptable forms of intervention at Riverside Bridge School include:
- leading or guiding a pupil by the hand or arm, shepherding them with a hand in the centre of the back or use of a 'One Person Escort'
 - holding a pupil who has lost control until they are calm and safe
 - physically moving between and separating two pupils
 - blocking a pupil's path
 - use of reasonable force to remove a weapon or dangerous object from a pupil's grasp
 - any necessary action that is consistent with the concept of 'reasonable force' where there is immediate risk of injury – for example to prevent a pupil running into a busy road or hitting or hurting someone
 - using the following disengagement and defensive PROACT-SCIPr-UK strategies;
 - Front Deflection
 - Front Approach Prevention
 - Front Arm Catch
 - Front Choke Release
 - Front Choke Windmill Release
 - Back Choke Release
 - Front Hair Pull Stabilisation / Release with Assistance

- Back Hair Pull Stabilisation / Release with Assistance
- One Arm Release
- using the following more restrictive holds
 - Two Person Escort

4.7 At Riverside Bridge School it is acceptable for doors to have double or high handles to ensure pupil safety, and for external doors to be locked for security purposes, when pupils are supervised by an adult.

4.8 Withdrawal is acceptable where a pupil is removed from a difficult situation and accompanied while they calm down.

4.9 Staff may defend themselves whilst bearing in mind the whole time their own safety as well as that of others and of the child who is the subject of any restraint or other intervention.

4.10 Staff are not expected to put themselves in danger by physically intervening and removing other pupils and themselves from a source of danger may be the proper thing to do. We appreciate the integrity of our staff and value their efforts to rectify situations that are difficult and in which they exercise their duty of care for their pupils. However, we do not require them to go beyond what is reasonable.

4.11 Normally, only staff who have been trained to an appropriate level will use restrictive physical interventions. However, in an emergency the use of force is justified if it is the only way to prevent injury or to prevent an offence from being committed. In these circumstances, the use of force should be reasonable and proportionate.

4.12 Where there is clear documented evidence that particular sequences of behaviour rapidly escalate into serious violence, the use of a restrictive physical intervention at an early stage in the sequence will be viewed as justified if it is clear that:

- primary prevention has not been effective
- the risks associated with not using a restrictive physical intervention are greater than the risks of using a restrictive physical intervention
- other appropriate methods, which do not involve restrictive physical interventions, have been tried without success

5.0 UNWARRANTED PHYSICAL INTERVENTION

5.1 Unacceptable forms of physical intervention at Riverside Bridge School include:

- any physical intervention designed to cause pain or injury including:
 - any form of corporal punishment, slapping, punching or kicking
 - holding by the neck, collar or otherwise restricting the ability to breathe
 - holding by the hair or an ear
 - twisting or forcing limbs against a joint;
 - tripping up a pupil
 - holding an arm out at neck or head height to stop them
 - holding a pupil face down on the ground or sitting on them;
 - shutting or locking a pupil in a room, except in extreme situations whilst summoning support
 - acts of aggression or anger by the user
 - force beyond what is needed to set a situation right, however aggrieved or cross a member of staff may be

- seclusion where a pupil is forced to spend time alone against their will except for short periods of time in extreme situations whilst help is obtained
- physical interventions used to achieve a search of clothing or property

5.2 Staff should also avoid touching or holding a pupil in a way that might be considered indecent.

5.3 All of the above interventions are indefensible and if applied will be subject to investigation within the Child Protection Framework laid down by the Safeguarding Children's Board.

6.0 RISK ASSESSMENT AND PLANNING USE OF PHYSICAL INTERVENTIONS

6.1 Some pupils at Riverside Bridge School behave in ways that make it necessary to consider the use of restrictive physical intervention as part of a behaviour management plan.

6.2 Where there is a foreseeable risk that a pupil could behave in such a way as to require restrictive physical intervention, a risk assessment will be undertaken.

6.3 Among the main risks to pupils are that a physical intervention will:

- be used unnecessarily, that is when other less intrusive methods could have achieved the desired outcome
- cause injury
- cause pain, distress or psychological trauma
- become routine, rather than exceptional methods of management
- increase the risk of abuse
- undermine the dignity of the staff or pupils or otherwise humiliate or degrade those involved
- create distrust and undermine personal relationships

6.4 The main risks to staff include the following:

- as a result of applying a physical intervention they suffer injury
- as a result of applying a physical intervention they experience distress or psychological trauma
- the legal justification for the use of a physical intervention is challenged in the courts
- disciplinary action

6.5 The main risks of not intervening include:

- staff will be in breach of the duty of care
- service users, staff or other people will be injured or abused
- serious damage to property will occur
- the possibility of litigation in respect of these matters

6.6 Whenever it is foreseeable that a pupil might require a physical intervention, the risk assessment will identify the benefits and risks associated with different intervention strategies and ways of supporting the person concerned.

6.7 Any member of staff who may have to use a physical intervention will always be fully briefed.

6.8 The school's behaviour policy and behaviour support guidelines will be referred to when developing and implementing behaviour management plans.

6.9 All behaviour management plans will be formally agreed before they are implemented and formally recorded.

7.0 BEHAVIOUR MANAGEMENT PLANS

7.1 Positive behavioural management plans will emphasise strategies to reduce or prevent the likelihood that problem behaviour will occur by:

- identifying settings and events that make the problem behaviour worse such as diet, medical conditions/illness, sleep, fatigue or social conflicts
- identifying events that precede, trigger or occasion problem behaviour such as task demands, instruction or peer/adult requests
- identifying outcomes that maintain problem behaviours such as attention, escape or avoidance
- teaching new social, behavioural and communication skills
- neutralising or eliminating the conditions that trigger problem behaviours or make them worse or more likely
- enhancing the living and learning options available to the pupil
- support the pupil in difficult situations
- safely manage crises if and when they occur
- summon additional support if required
- training needs for staff in implementing the programme

7.2 Restrictive physical interventions will therefore form part of a more general behaviour management strategy with physical intervention a strategy of last resort, once all other approaches for de-escalation, diffusion and prevention have been tried, or where there is clear danger or extreme urgency.

8.0 USE OF RESTRICTIVE PHYSICAL INTERVENTIONS IN UNFORESEEN AND EMERGENCY SITUATIONS

8.1 It is recognised that emergency use of physical interventions may be required when pupils behave in unpredictable ways.

8.2 Injuries to staff and pupils are more likely to occur when physical interventions are used in an emergency and for this reason great care should be taken to avoid situations where unplanned physical interventions might be needed.

8.3 In an emergency, the use of force is permissible if it is the only way to prevent injury or serious damage to property but even in an emergency, the force used must be reasonable.

8.4 Before using physical intervention in an emergency, the member of staff concerned should be confident that the adverse outcomes associated with the intervention (for example, injury or distress) will be less severe than the adverse consequences which would have occurred without the use of a physical intervention.

9.0 POST-INCIDENT SUPPORT

9.1 Following a significant incident of physical intervention the teacher or adult responsible should inform a senior member of staff as soon as possible. Arrangements will be made for the pupil

and staff to recover. Wherever possible, all those involved should be offered a debrief, which is appropriate to their needs (BILD Code of Practice, Section 2.1)

- 9.2 A post incident interview will be conducted to discover exactly what happened and the effects on the participants.
- 9.3 If a pupil or a member of staff has experienced injury or severe distress following the use of a physical intervention, they will receive prompt first aid and medical attention.

10.0 REPORTING AND RECORDING USE OF RESTRICTIVE PHYSICAL INTERVENTIONS

- 10.1 If it is foreseeable that a child will require some form of physical intervention, a written protocol will be produced including:
- a description of behaviour sequences and settings which may require a physical intervention response
 - the results of an assessment to determine any contra-indications for use of physical interventions
 - a risk assessment which balances the risk of using a physical intervention against the risk of not using a physical intervention
 - a system of recording behaviours and the use of physical interventions using an incident book with numbered and dated pages
 - a description of the specific physical intervention techniques which are sanctioned and the dates on which they will be reviewed
 - staff who are judged competent to use these methods with this person
 - the ways in which this approach will be reviewed, the frequency of review meetings and members of the review team
 - an up-to-date copy of this protocol must be included with the pupil's individual educational plan
- 10.2 When a physical intervention takes place, a full written account of the incident will be made by the member of staff concerned and recorded on a physical intervention form. An incident form will also need to be filled in if any injury has occurred.

The report will contain:

- name(s) of pupil(s) concerned, when and where the incident occurred
 - names of staff or pupils who witnessed the incident
 - the location of the incident
 - the reason for using a physical intervention (rather than another strategy)
 - the type of physical intervention employed
 - the date and the duration of the physical intervention
 - the pupil's response and the outcome of the incident
 - details of any injury to any person or damage to property
- 10.3 The report will be signed and dated by the member of staff and countersigned that it has been read by a senior manager who will:
- investigate
 - inform the pupil's parents
 - record any disagreements expressed by the pupil or adults about the event
 - take any appropriate further action, liaising with LA, governors, and acting within the LA's Child Protection Procedures

10.4 The use of a restrictive physical intervention, whether planned or unplanned (emergency) should always be recorded as quickly as practicable, and in any event within 24 hours of the incident, by the person(s) involved in the incident.

10.5 The contents of the incident log will be reviewed on a half-termly basis to:

- monitor pupil welfare
- monitor staff performance and identify training needs or outcomes
- contribute to audit and evaluation

11.0 TRAINING

11.1 At Riverside Bridge School training of staff is a vital component in our effort to ensure best practice and safe management of all school situations. Within Riverside Bridge School all staff will be trained in the *Positive Range of Options to Avoid Crisis* and use *Strategies for Crisis Intervention and Prevention (PROACT-SCIPr – UK)*. Some staff will also be trained in the TeamTeach approach to positive behavioural management which includes physical interventions as one element.

11.2 A rolling programme of training will be delivered by accredited trainers. Priority for training places within the programme will be given to staff working most directly where there is a foreseeable risk that a pupil could behave in such a way as to require restrictive physical intervention.

11.3 It is our aim that all staff will receive specific training and skill development on use of some basic techniques. Training and skill development on more advanced holds or methods for restraining and controlling others to avoid serious personal harm, will be arranged on a need to know basis should the needs of any pupils demand such restrictive intervention.

11.4 It is our aim that appropriate expertise is available to our pupils who may require physical interventions.

12.0 MONITORING USE OF RESTRICTIVE PHYSICAL INTERVENTIONS

12.1 Everyone connected with the school should know of the existence of the policy and feel free to study it in detail if they wish or need to do so. However, not everyone needs to know about specific incidents. The chart below sets out the information requirements of different groups.

12.2

	About the policy	About a specific incident
Governors	Yes	Not generally and never all governors
Parents	Yes	About incidents relating to their own child
Staff	Yes	About any incidents involving pupils for whom they have charge
Pupils	Yes	Only those they witness
Local Authority	Yes	Normally annual report

Unions	Yes	If informed by members

13.0 COMPLAINTS

- 13.1 We hope that by adopting this policy and keeping parents well informed we avoid the need for complaints. Any disputes that do arise about the use of force by a member of staff will be dealt with in accordance with the Child Protection Procedures, a copy of which is available in school. This could in some circumstances lead to an investigation by police and social services.
- 13.2 Complaints about this policy should be directed to the Head or Chair of Governors.
