

# Moon Zoom

## Half-Term Project

Our topic for this half term is Moon Zoom.  
These activities are for you to do at home with an adult. You can do all of them or choose the ones that you find most interesting.

Your project is due by **Friday 14<sup>th</sup> January 2022.**

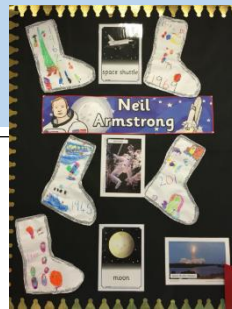

1. Choose a favourite feature of Earth. This could be the forest, the river, the weather or the sea. Write a postcard from space telling us why you chose this feature and describe what you would see.

Be creative!

2. Who is Neil Armstrong? Using the internet, research information about Neil Armstrong and present this information as creatively as you can.

3. With adult supervision, can you create an information sheet about the different planets we have in our Solar System? Then, using different materials, make the Solar System.

4. Lunar roving vehicles are used to travel on the Moon's surface. Use a range of materials to make a model of a lunar vehicle.
