

January

Swan Class had a fantastic time at the Discovery Centre for their first trip of the year. Our topic this term looks at classic stories, so it was great that they got to talk about and role play some of these.

In Maths, we have been learning about representing the number 5, and how many different ways we can make it.

We have also been learning about Chinese New Year for the Reception Class Assembly. The children have been practicing very hard and have done so well!
